Structure Stability Certificate

I visited and inspected the existing GLT Saraswati Bal Mandir Senior Secondary School situated at Ring Road Nehru New Delhi. The site has been checked visually and I found that columns, walls and existing slabs are ok. I assure that the structure is safe and sound.

I also recommend that the said ground + three storey existing structure is safe in all respect, including safety from earthquake and other natural hazards.

The school building has been constructed in stages; the following structural conditions must have been adhered to during designing of the structure and construction at site-

1) Certified that the building satisfies the safety as stipulated under clause 18 of Building Bye-Law, 1983 and information given therein had been factually correct to the best of us knowledge and understanding.

2) It is also certified that the structural design including safety from natural hazards based on soil conditions had been duly incorporation in the design of the building and these provisions had been adhered to during the construction.

3) This certificate is valid for one year only from the date of issuance.
